

1977 BENTLEY T2

Year : 1977

£0.00

Finished in Larch Green metallic paint, the interior is trimmed in Gold Parkertex Velvet with contrasting green hide welting and green carpets. The interior colour scheme is complimented well by the traditional Burr Walnut veneered fascia.

This 3 owner car was a special order through Hadley Green Garage for the first owner, taking delivery in November 1977, going to the second owner in November 1979, then current owner in December 1980 who has covered a total of 27,900 miles.

RR&B Garages have known this car since 2004, when we carried out a full service / hydraulic service and coach work repaint to bring the car up to a very high standard.

Since then, this car has been cosseted in a heated garage and received very little use, retaining its excellent condition.

Due to the low use this car has now received further recommissioning works Inc. Full Service, hydraulics service, ACU service and new tyres ready for the new owner.

This car is exceptional and viewing is strongly recommended to fully appreciate the condition and provenance of this beautiful motor car.

While the Parkertex cost the first owner an option premium, buyers are telling us they would prefer leather! If you would be interested in buying this car re-trimmed in leather in a colour of your choice, please contact us with no obligation to discuss the options.
